Women's Weekend Retreat – Saturday and Sunday

This two day intensive retreat programs will cover a connected
series of topics including

- Myers-Briggs personality profiling;
- social media and why we need to use it;
- values based communication;
- developing empathy with your audience and
- communicating through the media in difficult times.

The program is designed to instil the confidence,
knowledge and tools our local women need to start making
change in their communities 'one conversation at a time'.
