

FOX BAITING PROGRAM – FREE BAITS

Participation is now your legal responsibility!

The European red fox is now a declared pest species in NSW meaning there is now a **legal requirement** for public land managers and private landholders to control foxes on their land.

The most effective and efficient control is achieved through a group control program.

The Tarcutta Valley Landcare Group, in conjunction with the Cross Property Planning Project is offering landholders the opportunity to participate in a whole of landscape baiting program across the Tarcutta/Humula area.

FREE and subsidised baits

FREE FOX-OFF[®] baits will be provided to landholders who are members of the Tarcutta Valley Landcare Group or the Cross property Planning Project. Baits can be purchased at a 50% discount for all other landholders in the area (limit of 100 baits per property). Fresh baits can also be ordered at least 3 days prior to collection date.

Baits will be distributed on-farm towards the end of March to those landholders who have registered their interest in the program.

Registration: Please contact Peter McCallum on 0269 289 563 or Ainsley Wolter on 0410 724 231.

You **MUST** bring your current Chemcert card to obtain the baits

FREE Chemical Accreditation

FREE 1080/Pindone Chemical Accreditation training will be offered through the Riverina LLS for landholders who require accreditation to use baits.

Limited to 20 landholders.

FREE Managing your Rabbits Workshop

(refer to separate flier for more information)

A FREE workshop on current rabbit management options will be presented by Tarnya Cox from the Invasive Animal CRC, Orange and Toby O'Brien, Biosecurity Officer, Riverina LLS. Topics include Pindone, 1080 baiting, new strain of Calicivirus, follow-up control and burrow/harbour destruction.
