

PROTECTED CROPPING THE NEXT FRONTIER

Trade Expo and Seminars showcasing the opportunities for Protected Cropping in the Riverina

Riverina Farmers are now world leaders in water management.
The next frontier is controlling the impact of weather.

Why Protected Cropping in the Riverina?

The protected cropping industry in Australia is already worth \$2 billion in production and is the fastest growing sector in Australian Agriculture. The Riverina has water security, land, plenty of sunshine and are central to Australia's biggest consumer markets. Our access to domestic and international customers has improved dramatically.

but...

we have risky weather patterns – frost, storms, hail, wind, untimely rainfall and hugely variable temperatures. The impact of these can be managed in a Protected Cropping Environment.

Come along and learn. Industry overview, market opportunities, growing systems, finance, education and emerging technologies.

Who should attend?

Farmers, farmer groups, farm managers, investors, suppliers to industry, students and water license holders.

DATE: Tuesday February 20, 2018
